# Abhay Chauhan

Web developer  |  abhay.csgo001@gmail.com  |  +91 99589 64761
linkedin.com/in/thoughtlessnerd  |  github.com/thoughtlessnerd

## Skills

Languages:    Javascript, Node JS, Python, HTML5, CSS3
Technologies:    React, Typescript, Express, Node, React-native, MongoDB

## Professional Experience

### Freelance Fullstack Developer                                                      June 2022 - present

- Made the **frontend** part of the site https://aadiconsulting.com purely in html and css without any use of libraries
- Made a web app for Terranova museum in finland using **Express**, **Node** and **Html Css**. I worked on the **backend** and **frontend** of the app in this project.
- I also made the **NFT generator** for Springers NFT in which I worked on making **Node js scripts** to generate randomly generated frames and then encode them into gifs to make **5555 randomly generated gifs** with unique traits.

## Projects

### Logic Gates node editor (https://thoughtlessnerd.github.io/logic-gate-node-editor-v1/)

- I made this project using **pure Javascript** in Html.
- Focused on making **logic gates circuit simulations** in **realtime** and extremely inspired from Sebastian Lague's Digital logic sim
- I was also inspired by the shortcut keys and **UI of Blender's node editor** so I inherited them into this too, that is why adding a node is `shift + A` and deleting is `x`.

### Piano (https://thoughtlessnerd.github.io/Random-stuff/Piano/)

- I made this **piano** using **pure Javascript** and Html
- Focused on making a little project in which i use the **best practices** of writing code i recently learned from a book **"The Pragmatic Programmer"**
- Did my best to keep the **code future proof** and **error free** and **readable**

### Web Developer portfolio (https://thoughtlessnerd.github.io)

- I am working on my **portfolio site** currently. Making it in **Typescript, React Js and CSS**.
- Focused on making the most beautiful site I've ever made and showing most of my skills in this.
- Also practising my **UI/UX** skills side by side.

## Education

**Bhagwan parshuram institute of technology·B. Tech** in **Electronics and communication engineering**

## Interests

User Interfaces • Web design • Web development • Graphic Design • NFTs • App development
